This charming new animated series continues with more gentle adventures for the under-sixes. It's no accident that the four Piplings are as cute as buttons – the defining feature of each of them is based on an animal. De Li is kittenish and Lau Lau is rabbitlike (pictured together), while Yojojo is a cheeky little monkey and Nok Tok a cuddly bear. In each episode, a new set of real children, or Cheebies, enter the Piplings' world to interact with them, and bring about Buloo – 'a warm feeling of emotional harmony'. It sounds complicated on paper, but

it all makes perfect sense as you watch, and young children should be happily mesmerised by the Piplings and their magical world. Today, De Li is picking plumatoes, but the special box she uses to reach them on their tree goes missing. Can the Cheebies help her to find it?
